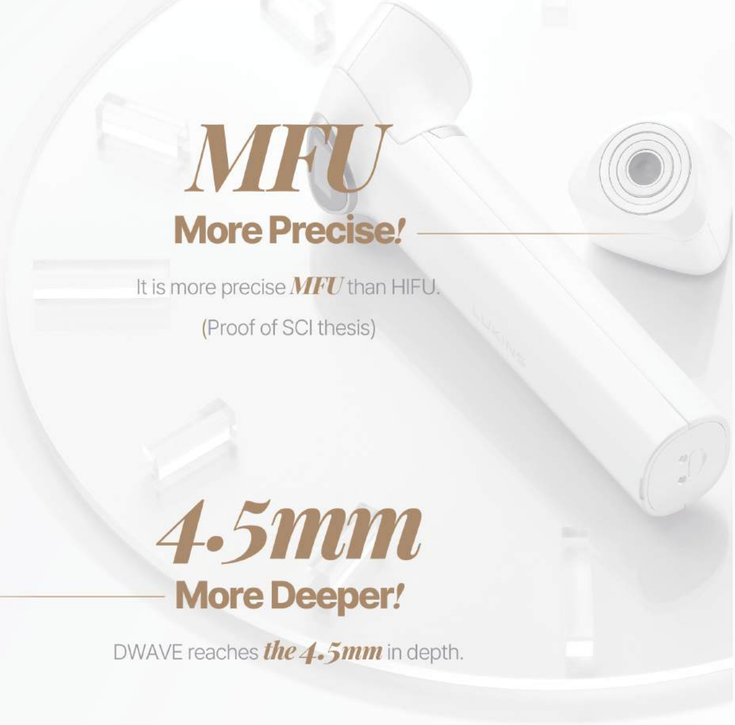
1,000,000
Shots!

DWAVE boasts an incredible ***1 million shots.***

500,000 + 500,000



MFU
More Precise!

It is more precise ***MFU*** than HIFU.

(Proof of SCI thesis)

4.5mm
More Deeper!

DWAVE reaches ***the 4.5mm*** in depth.

Dual Effect for your Skin - DUOWAVE

DWAVE

Dimension	50 × 70 × 230[mm]
Power Supply	DC 5V / 2A
Weight	240g
Battery	DC 7.2V / 800mAh
Cartridge	FACE / EYE(sold separately)
Charge time	90 minutes
Usage time	Over than 30 minutes. (Depending on the mode of use)

This product is a skin care device, not a medical device. Effects may vary depending on skin type.

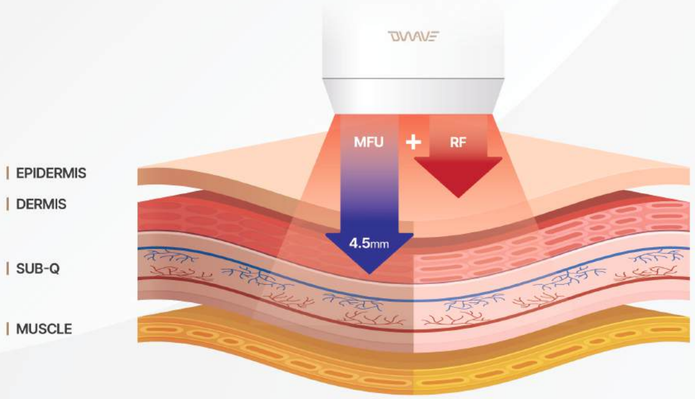
MFU+RF Dual Effect for Skin Solution

Using MFU(HIFU) & RF(1/2MHz) at the same time to give immediate improvement.

Using focused ultrasound and radio frequency at the same time, it manages elasticity of skin on the outside & inside simultaneously. It gives various effects of elasticity, wrinkle improvement, lifting, tightening, pores, skin texture, and skin tone all at once through self-regenerating of skin tissue and increase in skin defense.



MFU

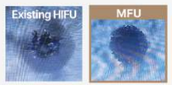
The principle of obtaining a lifting effect by creating a thermal coagulation point at a certain depth in the skin with solid output ultrasound, just as the convex lens collects light.

- Coagulation & Contraction of skin tissue at the targetted area
- Generating natural Collagen
- Improvement of Elasticity & Lifting due to upward pulling effect of skin

RF

Penetrates deep into the skin and generates heat in a specific area. The heat energy generated in deep skin is used for various purposes, such as skincare and body line shaping.

- Generating deep heat in specific area of skin
- Tissue contraction with heat energy
- Improvement of Skin elasticity



SELF Developed Technology of Less-Pain MFU Treatment
(Micro Focused Ultrasound)

MFU, a unique technology of DWAVE, coagulates specific focal regions in 1/3 of the area compared to normal HIFU. It gives more accurate and safe ultrasonic energy to the skin.

Five Modes Using Two Cartridges

Full face(4.5mm) and eye(2.0mm) treatment cartridges provide meticulous care and difficult-to-reach areas.

There are five resilience management modes. You can effectively manage elasticity by selecting the desired mode according to the skin condition and the area you want to treat.

Clinically Proven Effects of DWAVE

Its effectiveness has been proven through R&D and clinical trials by medical doctors.

It instantly improves the elasticity and skin texture. In addition, we were able to see the angle change at corner of the eye, corner of the mouth, and the chin line.

[Subjects 24 adult women aged 40-59 **| Test period** Nov 11, 2022 - Dec 05, 2022 **| Test institution** Korea Dermatological Research Institute **]**
