ulkin

HDU

HDU(High Dual Ultrasound)

A technology that goes beyond the conventional single ultrasound method to generate two or more high-density ultrasounds, increasing HSPs (Heat Shock Proteins) and GAGs (Glycosaminoglycans), while decreasing MMPs (Matrix Metalloproteinases) to promote cell regeneration and collagen production, improving 14 types of skin lesions.

120.46% improvement in skin density
183.59% improvement in skin stimulation
71.85% improvement in active ingredient
104.01% improvement in skin freckles and
104.9% improvement in skin moisture by layer

Using high dual ultrasound of 1MHz, 3MHz, and 10MHz, Ulkin has an excellent soothing effect and quickly and deeply delivers active ingredients to skin, and is highly recommended to use it after the skin booster treatment.

Configuration	Ulkin man body, cart, 3 handpieces, 220V power cord, user manual
Mode	Dual 1/3MHz, 3/10MHz Single 1MHz, 3MHz, 10MHz
Effects	[Managing 14 types of skin trouble] Regeneration, moisturization, elasticity, stretchmarks, slimming lifting, atopy, whitening, eczema, acne, bruise, scar, flush

ULTIGHT

MFU Inside

MFU(Micro Focused Ultrasound)

With the smaller and more precise micro focused ultrasound(MFU), make your skin elastic and sharp! Instant lifting & tightening!
With four types of cartridge categorized by skin depth, Ultight has minimized pain and maximized effect; you can check effects immediately after the treatment.

[Measurement of Internal Temperature Distribution for the Evaluation of Focused Ultrasound Stimulation Devices]

Annals of Plastic Surgery (SCI)
[Rejuvenation of photoaged aged mouse skin using high intensity focused ultrasound]

Journal of Cosmetic Dermatology (SCI)
[Handheld Microfocused Ultrasound Modality for Skin Tightening: ULTIGHT]

80% wrinkle reduction
115.5% improvement Skin density
300% increase in collagen generation

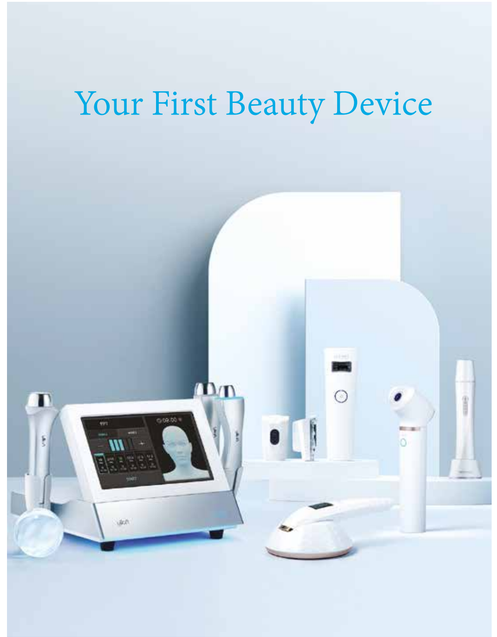

Configuration	Ultight main body, cradle, case, charging cable, 4 cartridges
Cartridge	Eye 2.0mm, Face 3.0/4.5mm, Chin 6.0mm
Frequency	7MHz

SINCE 2006

Your First Beauty Device

No Pain, Immediate Effect

MEDICON

EWAVE Electro-Adaptive Wave Control ™

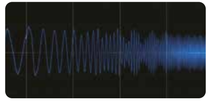

EP

EP(Electroporation)

Creates temporary micro-channels in the skin using ultra-fine electrical stimulation, dramatically boosting the absorption of active ingredients in your serums and skincare products.

Q-EP (Quintuple Electro-Poration)

Multi-Frequency Electro-Poration
with Low-, Mid-, and High-Frequency
Cross Stimulation

1 KHz	Deep Cell Opening: Formation of Deep Skin Pores
5 KHz	Barrier Relaxation: Temporary Relaxation of the Stratum Corneum
10 KHz	Selective Pore Control: Formation of Micro-Pores
15 KHz	Balanced Delivery: Enhanced Ingredient Absorption
20 KHz	Surface Refinement: Skin Firming

DWAVE DUOWAVE

MFU RF

MFU(Micro Focused Ultrasound) + RF(Radio Frequency)

With smaller and more precise micro focused ultrasound(MFU) and radio frequency(RF) dual layering, manage outer elasticity and inner elasticity at the same time! With 5 minutes of use every day, it resolves various skin concerns, including elasticity, wrinkles, moisturization, pores, skin texture, and skin tone.

10.52% improvement in outer elasticity around the cheek

14.03% improvement in inner elasticity around the cheek

24.06% improvement in skin density

22.17% improvement in double-chin lines

29.24% improvement in pore volume

Configuration	DWAVE main body, cradle, 2 cartridges, charging cable, user manual
Mode	Lifting, tightening, collagen, tone-up, eye zone
Number of Shots	Face cartridge 1 million shots, eye cartridge 1 million shots
Effects	Elasticity, moisturization, pores, skin tone, skin texture, gloss
Intensity	Levels 1–3

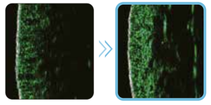

TWAVE THERAWAVE

HDU

HDU(High Dual Ultrasound)

A water drop lifting home care device using high dual ultrasound that resolves various skin troubles without pain or side effects! With high dual ultrasound energy of 3/10 MHz, TWAVE activates collagen and elastine inside the skin. You can perform home care without pain, stimulation, and side effects.

3.44% improvement in skin elasticity

6.42% improvement in skin texture

15.58% improvement in skin density

0.71% improvement in skin tone

Certification	FDA
Configuration	TWAVE main body, cradle, charging cable, user manual
Frequency	Dual 3/10MHz
Mode	Auto, Water, Tone up, Lifting, Special
Effects	Elasticity Moisturization, Whitening, Regeneration, Anti-aging, Trouble improvement
Intensity	Levels 1–3

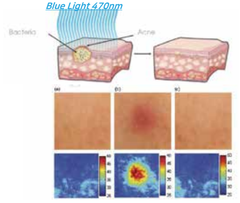

CLEANE ACNETHERAPY DEVICE

B.L.T Heat

BT(Blue light & Thermal shock)

This advanced technology uses Blue Light (468 nm) and thermal shock at 47°C to actively stimulate the synthesis of GroEL (HSP60) and dank (HSP70). By boosting the body's natural immune response against Propionibacterium acnes, it achieves an impressive 84.2% treatment success rate in acne patients.

Removes acne-causing bacteria deep within the skin to reduce inflammation and maintain the skin's oil–moisture balance. A 2-in-1 portable personal medical device with globally proven safety, supported by publications in SCI-indexed journals.

Certification 식품의약품안전처 FDA CE

Effects
- Improves acne-prone and troubled skin
- Maintain oil-moisture balance
- Daily 2minutes and 30 seconds acne care routine at home
- Heating range up to 48.3 °C with powerful performance
